

Providence School of Jacksonville – Medical Action Plan

The Providence administrative team has thoroughly reviewed this student’s evaluation documentation. Based on the professional recommendations provided in this evaluation, the following accommodations should be utilized as necessary to maximize the student’s academic participation and success.

The implementation of academic accommodations is a shared responsibility between the student, the teacher, and the parents. Students should request any or all of these accommodations as needed. Each requested accommodation and how it will be implemented should be discussed to ensure that it is appropriate to both the student’s needs and the format of each class.

Inclusion of an accommodation on an IEP/504 Plan/Formal Plan does not automatically qualify a student for accommodations on College Board tests.
